

Required Inspections – Commercial

☐ Footing Inspection

This is done after footing has been formed and all steel is installed.

☐ Foundation Inspection

This is done after foundation walls are formed and all steel is in place.

☐ Rough-In Underground Plumbing

This is done after the under slab plumbing has been installed. (**Water 60 PSI) (DWV 5 PSI or 10 Foot Head)**)

☐ Gas Piping Rough-In (contact Gibson County Utilities for gas inspections)

This is done after all piping and fittings have been installed, prior to concealment. A pressure test is required at this time.

☐ Framing Inspection

This is done after the rough framing is in place and before any insulation or concealment of framing structure.

☐ Above Ceiling

At this time all fire separations must be complete and any sprinkler piping complete.

☐ Sprinkler Hydro Test

This is done at after all sprinkler piping has been installed.

☐ Final Inspection

This is done after the structure has been completed and prior to the issuance of **Certificate of Occupancy**.

Please notify Building Dept. at least 24 hours prior to any inspection.

Contact Milan Public Utilities for all electrical permitting and inspections.
